

Sprint 2 Plan  
Down  
Team Downtown  
Oct 22 - Nov 7  
1.0 Oct 23

The goal for this sprint is to get data actually moving to the server and database. Along with completing quite a bit of backend code, and completely finish what's left of the basic interface for now.

As a user I would like a completed UI so I can interact with the app.

- Display a pop up window to expand an invitation 5 points
- Handle input errors 3 points
- Polish UI for existing events 8 points

As a user I would like my data to be stored on a server so I can have it always available.

- Securely connect username and passwords 5 points
- Check for new events every time I connect to the server 8 points
- Kill expired events 8 points
- On startup fetch events from server 5 points
- Have a temporary global event vector until server is set up, 13 points

As a user I would like to have a profile

- Create a profile class 21 points
- Set up a username/password for each profile 3 points
- Handle sent/received invitations 13 points
- Set up sent/received vectors 2 points
- Add profile picture functionality to the profile 8 points

Robin Singh: Scrum Master  
Kalpana Chinnappan: Team Member  
Lou George: Team Member  
Marcos Chabolla: Product Owner

Marcos Initial Task;

Display pop up window to expand an invitation

Robin Initial Task;

Check for new events every time I connect to the server

Kalpana Initial Task;

Handle input errors

Lou Initial Task;

set up profiles

Meeting Times:

Mondays and Wednesdays at 12:30pm and Fridays at 3:30 (with TA)
