

Sprint Report #1
Product: Down
Team Name: DownTown
Marcos Chabolla, Lou George, Robin Singh, Kalpana Chinnappan
10/23/15

Actions to stop doing: Binge working. We completed most of the tasks in a crunched amount of time near the ending of the sprint, doing work incrementally over the sprint would relieve the stress of the deadline and ease the flow of progress.

Actions to start doing: Better communication on tasks and progress of tasks.

Actions to keep doing: Keeping the progress pushed and up to date.

Work Completed/Not Completed:

Completed:

Working UI/Event Creation

- Event Name

- Event Description

- Event Time/Date/Location

- Customizable Accept/Decline

- Sent Confirmation

- Working Next/Back buttons

Working Event Object Class

- Accessor

- Mutators

- All Class Variables

- Working input from User

Not completed:

Swipe Right Gesture to Event Listing

- Implementation of the Fragment feature for Android was more complex than presumed and will take longer to complete than initially planned.

Work Completion Rate: Work Completion rate was sporadic because of the learning curve of a new development environment but most of the work was completed. Tasks need to be tracked more closely so that work is done more incrementally each day.
