Sprint 3 Report
Product: Down
Team Name: DownTown
Marcos Chabolla, Lou George, Robin Singh, Kalpana Chinnappan
11/27/15

Stop doing: Communication through facebook worked, but we needed a more concrete way of handling tasks online, finding time to meet up was difficult.

Start doing: Keeping all teammates updated on new content learned within new environments (Parse) would help the team as a whole function more evenly and smoothly

Continue doing: Communication for deadlines went well.

Work Completed:

Events stored in Vector on Parse
- Sent/Retrieved object information
- Displayable object information
- Events are expandable and display more detail
- List of persons invited running and viewable in Event information
- Automatic loading of events sent and received on app startup

Many UI improvements

Work not completed:

Does not properly kill events after they have past.

(Although not in the Sprint 3 Plan)

Facebook Integration

Local Events

Work Completion Rate: Work completion rate was slightly slower than projected but it was followed by spikes in progress as we learned how to properly implement certain functions.
