System and Unit Test Report
Product: Down
Team Name: DownTown
11/30/15

User Stories:
- A. As a user I would like to have a page where I can view sent and received invitations.
- B. As a user I would like the event vectors to be stored on our backend server.
- C. As a user I would like to be able to see who else is attending an event.

- Scenario A:
    - Open app
    - Enter username/password and log in.
    - Press the "MY EVENTS" button at the bottom.
    - Pick between the 2 tabs (received and sent)
    - Each tab should contain the events under that category.
- Scenario B:
    - Open app
    - Enter username/password and log in
    - Enter Event Name/Description/ Invite Friends /Hit Next Button
    - Enter Location/Date/Hit Next Button
    - Enter Time/Accept/Deny Messages
    - Send Event
    - Event can now be seen on parse.com by an administrator and it is not stored locally on the device.
- Scenario C:
    - Open app
    - Enter username/password and log in.
    - Press the "MY EVENTS" button at the bottom.
    - Pick between the 2 tabs (received and sent)
    - Press an event from the list to expand it.
    - Once expanded the list of people invited will be presented at the bottom.
