Sprint 1 Plan
Down
Team Downtown
Oct 5 - Oct 22
1.0 Oct 6

The goal for this sprint is to build a basic UI and create a working event object class that will take input from the user, make sure the user can view all previous events, and his sent/received event invitations.

As a user I want a UI to be able to create events.
- Event name, description, time/date/location   13 points
- Customizable Accept/Decline   3 points
- Sent confirmation   8 points
- Working Next/Back buttons   5 points
- Restart slides post-creation   5 points

As a user I want a UI to be able to see previous events.
- Multiple screens   5 points
- Tabs   5 points

As a user I want a UI to be able to view my sent/received invitations.
- Toggle between sent and received pages   21 points

Lou George: Scrum Master
Kalpana Chinnappan: Team Member
Robin Singh: Team Member
Marcos Chabolla: Product Owner

Marcos Initial Task;
        Creating multiple screens instead of one large one for all the pages, tabs
Robin Initial Task;
        Take care of time/date/location pages
Kalpana Initial Task;
   Handle input errors, working next/back buttons
Lou Initial Task;
        Event object creation, sent confirmation

Meeting Times:
        Mondays and Wednesdays at 12:30pm and Fridays at 3:30 (with TA)
